

SIMPLOT INJECTAWET

Combined Non-ionic Surfactant

Highly concentrated injectable soil wetting agent for use in most turf soil types for dry patch, poor soil wetting and water retention.

Simplot INJECTAWET is a concentrated injectable soil wetting agent to assist in overcoming localised dry patch and general water repellence in the soil profile.

Simplot INJECTAWET contains quick acting surfactants combined with other long-lasting soil surfactants. This allows for fast correction and longer residual wetting effects.

Simplot INJECTAWET enhances overall infiltration and dispersion of water in profile by overcoming water repellence factors caused by thatch and organic acids attached to soil particles.

GENERAL INSTRUCTIONS

This product is a highly concentrated soil wetting agent for use in various turf situations. It ensures adequate wetting of most soil types. This product is suggested in areas for dry patch in turf, areas of poor soil wetting and water retention

DIRECTIONS FOR USE: TURF

Injection

Rate: 10 - 20 L / megalitre of water.
Apply as required. Can be used with most conventional injections systems. Product can be diluted to suit any injection rate.

Boom Spray

Rate: 200 - 500 mL / 100 m²
20 - 50 Litres per hectare

PRODUCT ANALYSIS

75% Block Polymer / Ethoxylate Blend

PRODUCT SPECIFICATIONS

S.G: 1.01
pH (Neat): 6.5 - 7.5
Appearance: Clear liquid
Shelf Life: 3 years

AVAILABLE PACK SIZES & WEIGHTS

5 Litre: 5.3
20 Litre: 21.0
200 Litre: 212.0
1000 Litre: 1090.0
