## PRODUCT COVERAGE:

Based on the recommended turfgrass application rate

Number of Bags	Size of Bag	Coverage
1	11.34 Kg	19 m <sup>2</sup>
526	11.34 Kg	1 Hectare

## APPLICATION NOTES:

Use a sprayer with a boom, floodjet, handgun, or similar applicator. Calibrate sprayer to determine how many 100m<sup>2</sup> it covers per tank. Apply in early morning or late afternoon, avoiding periods of heavy direct sunlight. For best results, premix the required amount in water prior to adding to the spray tank or concentrate tank. This material dissolves faster in warm water. It gives off an endothermic reaction (turn icy cold) when it is being dissolved.
