

SIMPLOT GAMEDAY GREEN

Instant Natural Turf Colourant

Simplot GameDay Green is a unique instant natural green organic colorant with added nitrogen and iron to colour and condition turf grass while delivering all the benefits of concentrated organic matter.

INSTANT GREEN-UP

Simplot GameDay Green is specially formulated for application to turfgrass to give an instant natural deep green colour and condition the turf and soil at the same time. This product is designed to be sprayed onto the surface of the leaf and will remain there once dry. This is a very effective way of delivering environmentally friendly Humic Acid to turfgrass and green-up at the same time. Once colour has dissipated, the Humic Acids will remain to provide all the benefits of concentrated organic matter.

SOIL CONDITIONER

Humic Acids are large organic molecules that have binding sites that will capture and store nutrients. The use of Simplot GameDay Green will assist in the levels of humus in the profile and provide the flexibility required to grow quality turf.

Adding Humic Acids will increase the ionic exchange capacity of the sandy soils, buffer toxic salts, excessive pH ranges and stimulate biological activity resulting in root proliferation. Simplot GameDay Green assists in overcoming stress conditions such as recovery from renovation.

FERTILISER

Simplot GameDay Green now contains Nitrogen and Iron to continue with the natural green up and quality aspects of turf grass management. This added nutrition makes Simplot GameDay Green the best and most natural colorant on the market.

APPLICATION PRECAUTIONS

1. Do not water in immediately after application.
2. Apply on fine day with no forecast of rain
3. Avoid contact with fences or other fixtures as staining may occur
4. If contact occurs simply hose off contaminated area with water straight after application.

DIRECTIONS FOR USE: TURF

Application Rate

- | | |
|-------------------------|----------------------------------|
| 1. Turf Colorant: | 0.2 - 1.0 L / 100 m ² |
| Water ratio: | 5 - 20 L / 100 m ² |
| 2. Organic Conditioner: | 0.2 - 0.4 L / 100 m ² |
| Water ratio: | 5 - 10 L / 100 m ² |

PRODUCT ANALYSIS

		w/v%
Humic Acid	as Potassium Humates	12.0
Nitrogen (N)	as Urea	7.0
Iron (Fe)	as EDTA Chelate	0.5
Plus Wetter sticker		0.1

PRODUCT SPECIFICATIONS

S.G:	1.10
pH (Neat):	10.0 - 11.0
Appearance:	Dark green liquid
Shelf Life:	3 years
